

Dashboard Builder for Microsoft Access

Visual Insight to Your Access Data

KEY BENEFITS

- Gain rapid access to key performance indicators to make better business decisions
- Flexibility to define numerous dashboards that target the appropriate audiences
- Fast implementation with no VB coding or SQL expertise required
- Incorporate into your existing database, or operate as stand-alone application

FEATURE HIGHLIGHTS

- Unlimited dashboards and metrics
- Visual meters with configurable thresholds
- Drilldown to your form data from each dashboard metric
- Supports Microsoft Access, Microsoft SQL Server, and MySQL® Server linked tables
- Full source code access
- Lifetime updates

SYSTEM REQUIREMENTS

- Microsoft Access 2000, Access 2002, Access 2003, or Access 2007
- Compatible with MySQL® Server and Microsoft SQL Server™ linked tables (optional)

A key challenge every business faces is making use of the valuable transactional data collected every day. For businesses that rely on Microsoft Access to support business operations, putting key metrics at your fingertips can be onerous and require expertise with reports and SQL queries.

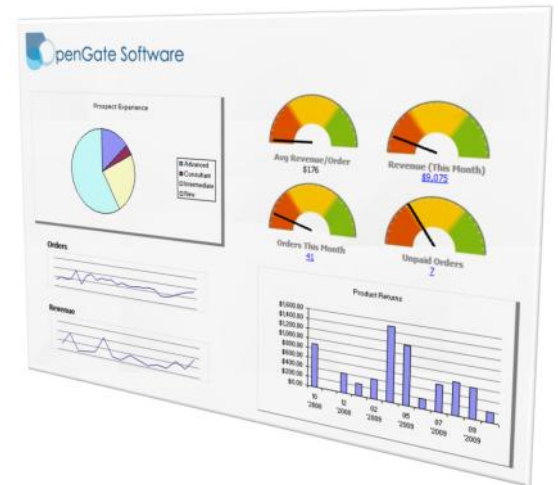

Creating informative reports and metrics that you can use to make solid business decisions generally requires numerous complex stored queries or custom VB coding.

Dashboard Builder is a powerful, flexible tool for Microsoft Access that helps you benefit from the valuable data your business collects every day. Quickly define dashboards and key metrics you want to monitor, then find the answers to critical questions that help drive your operational decisions like:

- What is the average sales price for the current month?
- How many orders you received this month versus last month?
- How many projects are over budget?

FAST DEPLOYMENT, QUICK RESULTS

Dashboard Builder is built for the average Microsoft Access user. If you are just starting out with Access Dashboard Builder provides an easy-to-understand interface to define key business metrics without being an expert in query creation. Experienced Access developers will appreciate the easy configuration, as well as the ability to access the full source code to enhance and modify Dashboard Builder as needed.

COMPREHENSIVE FEATURES THAT SAVE YOU TIME

Dashboard Builder offers comprehensive features for Microsoft Access that you normally find only in expensive business intelligence solutions. Instead of spending the time to create compound SQL queries and reports, Dashboard Builder gives you essential business metrics all in one place...so you can focus on what's really important. And advanced capabilities like the ability to create dashboards for SQL Server and MySQL linked tables means your investment will pay for itself even if you decide to upsize your database platform

Dashboard Builder for MS Access

WHAT OUR CUSTOMERS HAVE TO SAY

"If only everyone's technical service was as fast as yours is to respond to customers"

B.M.

"You have great tools, probably the best I have seen. It's saving me a lot of time in my development of custom apps."

M.C., Developer

MAKE YOUR DATA WORK FOR YOU

Rapid visibility into your operations on a daily basis should be easy...and with Dashboard Builder, it is. Whether you are a small one person operation, or a large enterprise with many departmental databases, Dashboard Builder offers an unlimited number of dashboards and metric combinations. You've worked hard to collect your data, now put it to work to drive more success through intelligent decision making with Dashboard Builder.

Dashboard Builder Features

STANDARD EDITION

- Create unlimited four-section dashboards with red/yellow/green dials
- Easily set up metrics that count/sum/average values from your data, or display the maximum or minimum values
- Define metrics for a specific date range (e.g., Today, This Week, Last Month, etc.) or an exact date range you specify
- Create 'compound' metrics that calculate more than one other metric (for example, divide one metric by another)
- Drilldown from data dashboards to your forms or automatically created queries based on the metric definition
- Set up the red/yellow/green meters to use another metric as the threshold value
- Automatically generate Outlook email message alerts when a specific metric threshold is exceeded
- Add meters and metrics to your own forms (minimal VB required, examples are provided)
- Customize the dashboards to include your own logo

PROFESSIONAL EDITION

- All Standard Editions features, plus:
- Create unlimited graph/chart dashboards that display your data in real-time
- Easy to understand graph definition screen that supports numerous graph types
- Display graph data by day, week, month, quarter, or year
- Four distinct graph sizes to embed in your own forms, include a sparkline graph
- Attractive dashboard template that combines graphs and meters
- Copy/paste graphs to any other Microsoft Office product (e.g., Power Point)
- Free access to the OpenGate Library, a collection of advanced MS Access tools

About OpenGate Software

OpenGate Software is a leading provider of Microsoft Access software products for businesses of every size, with thousands of users across the globe. We have been in business for over eight years, based near Denver, Colorado.
