

Dashboard Builder™ for Microsoft® Access™

Benefit from Your Data

A key challenge every business faces is making use of the valuable transactional data collected every day. For businesses that rely on Microsoft Access to support business operations, putting key metrics at your fingertips can be onerous and require expertise with reports and SQL queries. Creating informative reports and metrics that you can use to make solid business decisions generally requires numerous complex stored queries or custom VB coding.

Dashboard Builder is a powerful, flexible tool for Microsoft Access that helps you benefit from the valuable data your business collects every day. Quickly define dashboards and key metrics you want to monitor, then find the answers to critical questions that help drive your operational decisions like:

- What is the average sales price for the current month?
- How many orders you received this month versus last month?
- How many projects are over budget?

Rapid Deployment

Dashboard Builder is built for the average Microsoft Access user. If you are just starting out with Access Dashboard Builder provides an easy-to-understand interface to define key business metrics without being an expert in query creation. Experienced Access developers will appreciate the easy configuration, as well as the ability to access the full source code to enhance and modify Dashboard Builder as needed.

The Benefits

- Gain rapid access to key performance indicators to make better business decisions
- Flexibility to define numerous dashboards that target the appropriate audiences
- Fast implementation with no VB coding or SQL expertise required
- Incorporate into your existing database, or operate as standalone application

What's Included

- Unlimited dashboards and metrics
- Visual meters with configurable thresholds
- Drilldown to your form data from each dashboard metric
- Supports Microsoft Access, Microsoft SQL Server, and MySQL® Server linked tables
- Full source code access
- Upgrade to new releases

Requirements

- Microsoft Access 2000, 2002, 2003, or 2007
- Compatible with Access runtime versions (optional)
- Compatible with MySQL® Server and Microsoft SQL Server™ linked tables (optional)

Comprehensive Features that Save You Time

Dashboard Builder offers comprehensive features for Microsoft Access that you normally find only in expensive business intelligence solutions. Instead of spending the time to create compound SQL queries and reports, Dashboard Builder gives you essential business metrics all in one place...so you can focus on what's really important. And advanced capabilities like the ability to create dashboards for SQL Server and MySQL linked tables means your investment will pay for itself even if you decide to upsize your database platform.

Make Your Data Work for You

Rapid visibility into your operations on a daily basis should be easy...and with Dashboard Builder, it is. Whether you are a small one person operation, or a large enterprise with many departmental databases, Dashboard Builder offers an unlimited number of dashboards and metric combinations. You've worked hard to collect your data, now put it to work to drive more success through intelligence decision making with Dashboard Builder.

Dashboard Builder Editions

Dashboard Builder is available in two editions. The Standard Editions includes the ability to create dashboards with meters and dials and the numeric metrics. The Professional Edition includes all the features of the Standard Edition, but adds graphing and charting capabilities.

Metric Definition Setup This metric is valid

General Settings (required)

Metric Name: Revenue (This Month)
Description (hover): This Month-Revenue
