• Support for calculated fields and

Grouping, sorting, and formatting

Automatically create subreports to

see related data from other

Customizable report styles

And many more features!

Lifetime support and updates

SYSTEM COMPATIBILITY

Microsoft Access 2000, 2002,

• Compatible with MySQL® Server

and Microsoft SQL Server™ linked tables (optional)

2003, 2007, and 2010

Professional, Dynamic Access Reports

When Microsoft Access becomes a key part of your department or business, the next logical step is to make sure you are getting valuable information out of your database. The Access Report wizard can help you create rudimentary reports, but users often spend hours of trial and error to create truly useful reports.

The most common requirements for Access reports are:

- Professional formatting with logos, page numbers, and footer text for copyright or disclaimer information
- A look and feel that is consistent with your company's branding
- The ability to group and sort by one or more fields
- Record counts and totals for key fields.
- Control over formatting and field widths in the report

Report Builder for Microsoft Access helps you meet the key report requirements every Access user has....all from within an easy-to-use wizard interface that takes you step by step through the report creation process.

PROFESSIONAL REPORTS IN LESS TIME

Report Builder allows you to choose from several predefined report styles that control the look and feel of the entire report. You also have the option to create your own styles, to ensure your reports have a consistent look and feel that represents your business. Need to change styles? Never a problem. Just update the style and recreate your reports in a few quick steps.
